

DB2 MG DIRECT THREE-PHASE MULTIFUNCTIONAL METERS

standard functions:

- measurement of active energy
- measurement of reactive energy
- maximum demand indicator
- measurement of current, voltage, active and reactive power for each phase
- current range 10-60A
- current range 10-80A
- current range 10-100A
- up to four tariffs
- class: active 1 or 2; reactive 2 or 3; Pmax 1
- optical port for local communication, which uses software DB2FPsi for PSION and DB2FServis for PC

additional functions:

- wired RS232/485 port
- LED and pulse outputs for energy
- programmable outputs for power relay control or tariff and maximum demand indicator control
- switch clock or RCR device
- event registration
- load profile registration
- network connection possibility
